## TO WHOM IT MAY CONCERN

### RE: LETTER OF ATTESTATION FOR VILLAGE MEDICAL PROJECT

I write to attest that Village Medical Project is a non-governmental organization registered with the Ministry of Finance and Economic Development and working in collaboration with the Ministry of Health and Sanitation in Sierra Leone on agreed activities and areas of operation with the aim of maternal and child morbidity and mortality in the country.

Village Medical Project is striving to improve the health and wellbeing of people in Sierra Leone through the use of life-saving medical treatment to more than 6513 inhabitants in the hard to reach villages they cover and it is believed that these interventions have contributed to reduction in Maternal and Child Morbidity and Mortality over the years.

VMP and team of health professional has been visiting Sierra Leone regularly since 2008 and involved in the provision of free medical examination, diagnoses and treatment to targeted groups including but not limited to vulnerable persons, pregnant women, infants and children under the age of five years in districts thereby complementing the Government's Free Health Care Initiative.

Additionally VMP is working closely with the Directorate of Research and Non Communicable Disease of the Ministry of Health and Sanitation in implementation, supervision and outreaches activities in the country.

On this note therefore, the Ministry is appreciative of any support rendered Village Medical Project in pursuit of their activities as they will go a long way to improve the health of the people in Sierra Leone.

Yours faithfully,

**Yayah A. Conteh**

**Principal Donor/NGO Liaison Officer**
